3. Mark Saulka discussed the goal of the Committee for the next term stating that the committee acts as a conduit of pathway to the City for the Prospect Heights citizen to communicate their concerns with flooding and drainage issues. Discussion followed regarding what the bench mark is for measuring the water depth and the potential for flood potential. Mark will review the Christopher Burke Study to determine if this was addressed. He will also meet with the appropriate City Council member to discuss these issues. He also discussed that a depth measurement gauge would be advantageous to monitor for potential flooding problem. This could be placed in a slew or in Lake Hillcrest. He will discuss this with the appropriate City Council member prior to next committee meeting.

The next monthly meeting will held at City Hall on April 9, 2013 at 3:00pm.

The meeting was adjourned at 3:55pm.
